

ULTIMATE BABY

A Sci-Fi Anime Series

A PLOT - ULTIMATE BABY: The plot of Amanda's ULTIMATE BABY dream provides the dramatic framework for the story:

Scientists have calculated the perfect genetic complement to the Prince's own. If the two of them were to produce an heir, that heir would be the ULTIMATE BABY. The only problem? The owner of that perfect gene set is a streetrat that no one's ever heard of. Unfortunately, she has a criminal record, too. The Secret Service eventually finds her sneaking into the Prince's room and shoots her dead, thus destroying any hope of producing the ULTIMATE BABY and causing the royal family to fall out of power.

B PLOT - THOSE ARE ILLEGAL:

Spinning Car Racing. Using illegally gained and modified S.P.I.N.N.I.N.G. power cell prototypes, the underground world of street racing flourishes. These power cells were developed by top scientists to produce energy for **Weapons of Mass Destruction**. Mechanics fitted the new power cells to cars, giving the cars more power and speed than ever before. However, the original power cells were large and had to be somewhat awkwardly placed on top of the cars. Now they are much smaller and fit inside the body of the car. In fact, they're small enough to fit in motorcycles. Racers and mechanics often adorn their babies with tubes that shine with the light from the Spinning cell's reaction, giving the whole affair a bright and electric feel.

C PLOT - WHO ARE YOU:

Unbeknownst to the general public, the current "Prince" is actually a fake. He's a clone of the original prince, who was banished and exiled. This new Prince was raised specifically for breeding the ULTIMATE BABY. As such, he's not allowed to leave the palace very often, nor is he allowed any relationship with members of the opposite sex. He's also not informed of his unusual "birth." But he has strange dreams of another that looks just like him. Avoiding the eye of the secret police, the real prince returned in secret to the City. He joined the underground street-racing racket in disguise and eventually returns to the palace. The false "Prince" is understandably frightened, but also extremely curious as to this mysterious doppelganger. He asks "Who are you?" The prince responds with a smirk, "You." Then shoots the clone dead.

ENDING - APOCALYPSE HOW:

With the royal family booted from power, the lesser nobles start to fight amongst themselves for power. With no leadership, the police and military fill in. However, the fighting and tension spills out onto the streets of the city. People betray their friends and neighbors to the police. People just don't know who they can trust anymore. Finally, society snaps. People begin fighting and killing each other in the streets. Society crumbles and the once successful City becomes a wasteland where only the fittest survive. This is where we end the series.
