

Facebook Account Destroyer

By DrBlowFish from HackForums

You may have just purchased this E-book, wondering how you may get rid of Pictures, and even accounts. This E-book is going to teach you step by step based on certain scenarios, to get rid of unwanted pictures and accounts.

About The Author

The author DrBlowFish, is a social activist in the United States. I enjoy Black Hat hacking, Coding, GFX, Artwork, and more. I have found multiple exploits in many Social Networks such as Facebook, which I will be teaching you in this E-book to destroy other's FaceBook account content.

Concept

The concept of this E-Book is that, as you get content removed from a person's facebook Account, they gain "Strikes" which no one can see while facebook administrators can. When a person on facebook gains enough Strikes they are banned from facebook.

Getting Started

First off, you want to find your victim, someone with content you could relate yourself to and get Facebook to remove.

Once you have found the person you want to get off of facebook, look through their pictures reporting anything that is offending you, and make sure to use the Harassment option.

This will give you the edge in getting their facebook removed, because they may have pictures that actually

go against the facebook rules, getting them strikes without you even trying.

If that step works, you do not have to go on to this next step.

This next step, involves a bit of "Black Hat" you could say, because you are copying from their photo's, and getting them on your profile to portray as someone in their photo and get it removed because they don't have permission.

After you have done the first step, now go into their photo's, and look for a picture of someone else or a picture of them with some other people.

Here is an example, lets say you found a suitable picture like this.

Now that you have a picture, look through the people in the picture and single one out like this.

Now you have a person singled out, download the picture, and crop out their face to put it in a separate picture like this.

Now you have this picture, make it a profile pictures of yours.

(OPTIONAL:

Edit the picture so it isn't exactly like the one you stole from)

After you have made this your profile picture, now report the original photo.

When you report a picture to facebook, it will ask you for a specific reason.

I would pick Harassment, or that they don't have permission.

The photo should be removed within an hour or less.

That is how you can give a Facebook profile a strike, and get their content removed which leads up to an Account Ban. Hopefully now you can see that this is a Facebook staff Security Loop, as you can manipulate them to get rid of others content.

Thank you for purchasing my E-Book, and I hope you enjoyed it.
