Introduction

Welcome to the BradyGames Official e-Guide to *Monster Hunter™ 3 Ultimate*—a co-operative effort with our partners in Japan at Enterbrain.

We've provided all the information you need to become a master hunter, including critical stats on every monster so you can take them down easily and efficiently.

You'll also find details on all locations you visit as a beginning hunter—and where to find the items essential to survival.

If this is your first *Monster Hunter™* game, check out our comprehensive Basics section to familiarize yourself with the layout of the two towns. These locations serve as bases for your hunting adventures. You'll also benefit from a thorough primer on how to use the many weapon types found in the *Monster Hunter* world.

We have assembled a wealth of data for the veteran hunter, including how to build the weapons and armor necessary to zoom through Low-rank missions and move into High-rank, the true test for a Hunter. We also feature a detailed Skill list, all possible item combinations, and a complete guide to earning every Award on your Guild Card.

Let the Hunt Begin!

Monster Hunter Series Timeline

Monster Hunter 3 Ultimate (*MH3U*) is the 10th entry in the mainline *Monster Hunter* series, and the first on the Nintendo 3DS. *MH3U* also marks the first game in the series to be released in North America since 2010's *Monster Hunter™ 3 –Tri-*.

The Hunter's Story

In *MH3U*, you play as a rookie hunter in Moga Village, a small fishing village in the *Monster Hunter* world. Shortly after arriving, you experience a massive earthquake, thought to be caused by the fearsome lightning wyvern, Lagiacrus.

Your job is to investigate the cause of the earthquakes and, if possible, eliminate the Lagiacrus terrorizing the village. To do this, you must build your skills by hunting weaker monsters in the area, create stronger and stronger equipment by felling ferocious beasts, and become a master hunter capable of taking down the Lagiacrus!

The Flow of Hunting

Monster Hunter 3 Ultimate is not a linear game—you have the choice to tackle any Quest available, as long as you're qualified enough! Most Quests start and finish the same, however, and there is a specific flow once one has started and once one has ended.

Step 1

Before going on a Quest, you need to take a Quest from the Guild's Quest counter. Many Quests have a small cost associated with them, which is repaid on successful completion of a Quest.

Step 2

After taking a Quest, you must depart by heading toward the docks in Moga Village or the gate in Tanzia Port. Once you've started a Quest, you can't go to your house or change areas, so make sure you've done all your preparations before taking a Quest.

Step 3

Depending on the type of Quest you've taken, you complete the objective in one of two ways:

To complete a Quest that requires items to be delivered, collect the items and take them to the Red Box in the Base Camp. Once the requested items have been delivered, the Quest is complete.

To complete a Quest where a monster must be defeated or captured, simply capture or defeat the monster! If a Quest requires a monster to be defeated, you can still complete the Quest by capturing the monster.

©2013 DK/BradyGAMES®, a division of Penguin Group (USA) Inc. All Rights Reserved.

From the Library of Jak Murasaki

Step 4

After you've fulfilled the Quest's objectives, you are given a short amount of time to carve a defeated monster or otherwise gather items. This is usually 60 seconds for defeating a monster and 20 seconds for capturing or delivering goods.

Step 5

Once the Quest Complete message is received, you are taken to the Rewards screen where a set of rewards for completing the Quest are given. You can choose to collect the items and carry them on your person, send them to your Item Box (storage), or sell the items right away. If you wait too long without doing anything, the items are automatically sold. In most cases, you should send everything to your Item Box.

This flow is interrupted if you fail your Quest. There are three ways to fail a Quest:

- REWARD IS DECREASED TO 0Z: Every time your or another player's health is depleted, the Quest's reward decreases, in most cases by 1/3. Once the reward is decreased to zero, the Quest immediately ends in failure.
- TIME EXPIRED: In most cases, you're given 50 minutes to complete a Quest, although this amount can, at times, be lower. Check the remaining time in a Quest by looking at the clock next to your health bar or by checking the Quest Status screen.
- TARGET IS DEFEATED: This only applies to Quests where you must capture a monster. If you defeat the monster before capturing it, you fail the Quest and receive no rewards.

Combat

Most of your time in the world of *MH3U* is spent locked in combat with one of the many large monsters. You should learn the nuances of combat before attempting to challenge any of these ferocious foes.

Sharpness

One of the most important aspects of combat in *MH3U* is your weapon's Sharpness. You may notice how your weapon occasionally bounces off of a monster. This is because the Sharpness of your weapon is too low to penetrate the monster's hide! Even though they are blunt weapons, the Sharpness of Hammers and Hunting Horns also affects whether or not the weapon bounces off of an enemy.

Monsters often have different degrees of hardness on certain parts of their body. For example, you need a weapon with Blue Sharpness or better to penetrate a Barroth's head, but only a weapon with Green Sharpness to penetrate the rest of its body.

Attacks that bounce off of a monster's body deal less damage than normal, and attacks that bounce cannot be chained—even into a roll! Also, if your attack bounces off of a monster, you'll often find yourself vulnerable to damage. Even if a part on a monster is more vulnerable than the others, you should target areas where your weapon doesn't bounce over the area that suffers the most damage.

If you're having trouble with your attacks bouncing, consider using a Hammer or the Mind's Eye skill. The Mind's Eye skill allows your weapon to never bounce off of an enemy, while the Hammer's level 3 charge attack has Mind's Eye applied to it whether or not you have the skill equipped! Even if you have Mind's Eye, your attacks still do decreased damage when attacking an area that would normally cause your weapon to bounce.

A weapon's Sharpness determines how much damage you do with every attack, as well as how much damage is dealt by Elemental attacks, making it as important of a weapon stat as its standard attack!

This number doesn't affect your total damage, only the damage before computations. You won't quite deal 50% more damage with every hit, but you certainly deal a considerable amount more! You can consider a weapon with Blue Sharpness to have 15% more attack power than a standard weapon. This is something to keep in mind when choosing a weapon to purchase.

SHARPNESS DAMAGE MULTIPLIERS

SHARPNESS	ICON	ATTACK	ELEMENTAL ATTACK
RED		0.5	0.25
ORANGE		0.75	0.50
YELLOW		1.00	0.75
GREEN		1.05	1.00
BLUE		1.20	1.06
WHITE		1.32	1.13
PURPLE		1.44	1.20

From the Library of Jak Murasaki

Elemental Attributes

Many weapons, in addition to normal damage, deal additional damage in one of five elements: Fire (FI), Water (WA), Ice (IC), Thunder (LI), and Dragon (DR).

Elemental damage is calculated differently than normal damage. Monsters have specific Elemental weaknesses. Elemental damage is often just as useful as raw damage and matching the right element against the right monster can quickly end a battle.

Abnormal Status Ailments

Some weapons, in place of Elemental damage, can inflict status effects on the enemy. There are three types of status effect, each with its own benefits.

Status effects are not inflicted with the first hit—they must continuously hit an enemy in order to trigger. Each enemy has a different resistance to status effects, so try not to use Poison weapons on a monster that uses Poison.

POISON

Poisoned enemies suffer a fixed amount of damage over a set period of time. This damage is inflicted regardless of the enemies' armor, making it very useful against monsters with thick skin and high defense.

PARALYSIS

Paralyzed enemies are incapacitated for a brief period of time, allowing you and your hunting partners to unload on them without fear of retribution.

SLEEP

An enemy inflicted with Sleep stops and falls asleep. Unlike Paralysis, a sleeping enemy awakens instantly after being hit, so sleeping monsters should be hit with the strongest attack possible. Also, the attack that awakens a sleeping enemy deals extra damage. This means that hitting them with a Barrel Bomb or Level 3 Charge Great Sword attack deals enormous damage!

Affinity

This stat represents your chance of performing a critical attack, as well as how much damage a critical attack deals.

Affinity basically translates directly into extra damage. Weapons with powerful single attacks especially benefit with Affinity, allowing attacks like the charged Greatsword and Hammer attacks to deal even more damage.

Equipment

In the world of Monster Hunter, monsters only get stronger and stronger, so you must constantly upgrade with newer, more powerful weapons and equipment to fight them.

Equipment comes in two general types: weapons and armor. Both of these have two categories of their own: Blademaster (melee fighter) or Gunner (ranged weapon user).

This section of the guide provides general information on all the weapon types in the game, as well as a primer on how armor and its associated skills function.

Blademaster Weapons

Great Sword

DAMAGE TYPE: CUT

The Great Sword is a slow but incredibly powerful weapon. It's best suited for Hunters who want to patiently pick their spots and finish a monster with a few extremely potent attacks.

When using the Great Sword, primarily focus on hitting with its Level 3 charge attack. This move can be used while the weapon is sheathed; practice this technique to increase mobility.

The Great Sword can guard attacks, but it should only be used as a last resort, since most attacks inflict a great deal of red Health and quickly drain your Stamina.

Long Sword

DAMAGE TYPE: CUT

The Long Sword is a terrific balance between the immense power of the Great Sword and the mobility of the Sword and Shield. The Long Sword is a great weapon for players familiar with other 3-D action games, looking for more mobility in their weapon.

As you hit enemies with the Long Sword, your Spirit gauge (located underneath your Health and Stamina gauges) fills, giving you access to powerful Spirit slashes. These attacks never bounce off an enemy, making them very useful against enemies with thick hides. When your Spirit gauge fills, you gain an attack boost for a limited time and your Spirit gauge does not drain for 30 seconds. This allows you to perform Spirit slashes without having to worry about your gauge!

If the full 4-attack Spirit combo is performed, you gain an Attack power boost for a few minutes! You can enhance this boost three times (your gauge turns from white to yellow to red), and then extend it by landing the full Spirit combo again.

Sword and Shield

DAMAGE TYPE: CUT

The Sword and Shield combines defense with mobility at the expense of attack. Sword and Shield attacks start and finish very quickly and can be cancelled into a roll at any point, allowing you to safely pick away at your enemy.

By itself, it is difficult to kill enemies with the Sword and Shield due to its relatively low damage per hit. Because it hits so often, you should use Elemental and Abnormal Status weapons over raw damage weapons since you are more likely to inflict ailments.

The Sword and Shield can use items while the weapon is drawn, allowing you to defend while healing yourself. When used along with the Wide-Range skill, you can essentially act as a healer, healing your allies while defending yourself!

Dual Blades

DAMAGE TYPE: CUT

These twin swords are capable of dealing huge damage very quickly, shredding small and large monsters alike. Dual Blades are great weapons for aggressive players that don't mind constantly being up close and personal with large beasts.

By pressing the R button you can enter Demon mode, which gives you more potent attacks, a quick dashing dodge, and the ultra-powerful Demon Flurry attack at the cost of Stamina. If a large amount of damage is dealt while in Demon mode when your Stamina is depleted, you enter Archdemon mode. This allows you to perform Demon mode attacks and Dashes without spending any Stamina!

Hammer

DAMAGE TYPE: IMPACT

The Hammer is a weapon meant for players that want to deal as much damage as possible in only a few attacks. Much like the Great Sword, the Hammer is based around Charge attacks. Unlike the Great Sword, you can move while charging the Hammer, making it easier to score a big hit.

The Hammer is also one of the few weapons that can deal Impact damage, allowing it to dizzy enemy monsters and break certain monster parts, like Barroth's head! When using the Hammer, try to aim for the head whenever possible.

DAMAGE TYPE: IMPACT

The Hunting Horn is a unique weapon that can buff your partners and debuff your enemies without using any items! The Hunting Horn is also one of the two weapons that constantly deals Impact damage, allowing it to dizzy enemies.

Each Hunting Horn has three notes attached to it, which determine what buffs and debuffs it can apply. Each Hunting Horn attack plays a note and, once enough notes have been played, can bestow a buff by performing the combined notes.

Lance

DAMAGE TYPE: CUT

If you want immaculate defense but also extreme attack power, look no further than the Lance. It can defend most attacks without taking any red Life and is also capable of dealing tremendous damage to enemies that try to attack.

The Lance's counterattacks allow you to block an attack and immediately strike back, dealing damage while on defense! By tilting the Circle Pad toward your enemy and pressing X, you charge toward your opponent while blocking, absorb their attack, and gain position to punish them!

Gunlance

DAMAGE TYPE: CUT

Much like the Lance, the Gunlance is a great defensive weapon that is still an offensive powerhouse. Instead of focusing on precise attacks, the Gunlance is more interested in blowing away enemies with extreme force.

The Gunlance's most potent attack is its WyvernFire maneuver, which trades a large amount of Sharpness for an immensely powerful explosive attack! WyvernFire can only be used every so often. Feel free to unleash it whenever you can so it can recover sooner!

Switch Axe

DAMAGE TYPE: CUT

The Switch Axe can change from Axe to Sword at the press of a button. In Axe mode, movement speed is slower but attacks can be performed quickly and chained together infinitely.

Sword mode is limited by the gauge located underneath the Health gauges. It is immensely powerful, dealing tons of damage in a limited time. While in this mode, you can unleash an attack that expends your Sword gauge into one explosive attack dealing enormous damage!

Gunner Weapons

Bowgun

DAMAGE TYPE: BULLET

Bowguns are ranged weapons that allow you to attack enemies from a distance. Bowguns, while dealing less damage in general than melee weapons, can constantly fire at an enemy (no matter where they are). This gives Bowguns great damage capability overall.

There are two types of Bowguns, each with its own advantages and disadvantages. The Light Bowgun features much greater mobility but is weaker than the Heavy Bowgun. Like its name indicates, the Heavy Bowgun has much greater offensive power, has the capability to block, and can enter into crouch mode where it can unload large quantities of special ammo without needing to reload. All this comes at a movement price. Your Hunter moves very slowly with a Heavy Bowgun, making escaping enemy attacks difficult if you weren't already prepared.

Before selecting a Bowgun, try each one of them out and see if you prefer speedy movement or extreme power.

Bow

DAMAGE TYPE: BULLET

Much like the Bowgun, the Bow is a ranged weapon capable of fighting enemies from long range. You don't have to reload a Bow, but it is incapable of equipping different ammunition types. Instead, different Coatings can be applied to your Bow, which give your arrows unique effects such as poison, paralysis, or simply added power.

The Bow can add on to its damage by using powerful charge attacks. The type of the attack performed when a shot is fully charged changes, depending on the Bow. Try each one of these special attacks and see which you prefer.

Armor

You won't become the greatest Hunter in the world with weapons alone. You also need to constantly craft new armor to sustain attacks from stronger monsters.

In most cases, armor comes in sets of five pieces: head, torso, arms, legs, and feet. There are some armor sets that do not have a full set of five pieces. Most armor can only be equipped by either Blademaster or Gunner weapon users, so be sure to purchase the correct set of armor for your preferred weapon class.

Each large monster has an associated armor set with it. After defeating a large monster, head to the Smithy and check out the available armor and see if there's anything you can use!

Armor pieces also have associated elemental weaknesses and strengths, usually tied to the monster they came from. For example, the Great Jaggi is very weak to fire and so is his armor! If you think you're taking more damage than you should from an enemy, check your elemental defense and think about changing armor!

Talismans and Decorations

In addition to armor series, there are two ways you can enhance the Skill points on your armor: Talismans and Decorations.

Talismans are additional equipment you can equip that don't provide any defense, but do offer extra Skill points. While Talismans are completely valuable, it can be very difficult to get the Talisman you want as after discovering a Talisman the Talisman you receive is completely random! Strive to collect pages full of Talismans so you're ready to activate the Skill you want.

Decorations are items that can be attached onto Armor to increase or decrease the Skill points given by the armor. You can use Decorations to earn extra points in a Skill you can't quite earn or add more points to a Skill and enhance its abilities. To create and apply Decorations to armor, head over to the Smithy.

Each Decoration requires a Jewel of various qualities ,as well as monster parts or other items to create. Each Decoration also occupies a certain number of Slots—a 2-Slot decoration will only fit into a piece of Armor with two or three open slots and cannot fit onto two pieces of Armor with one open slot each.

The Decorations List has the following information:

Name: Name of the Decoration.

Village/Tavern: The earliest ★ ranking you can earn the materials required to create a Decoration in both the Village and Tavern. Some items can only be earned in Village Quests while others require you to play in the Tavern. Other items can only be earned after reaching a certain HR ranking or through downloadable (DLC) Quests.

Added Skill/+: What Skill points are added whenever the Decoration is applied.

Subtracted Skill/-: What Skill points, if any, are subtracted whenever the Decoration is applied. Some Decorations do not subtract Skill points.

Slots: How many open Slots are required to apply the Decoration onto a piece of armor.

Requirements: What items you need to create the Decoration.

Rarity: The Rarity ranking number of the Decoration.

Armor Skills

Each piece of armor has a set of skills it can potentially bestow on you. Skills grant unique properties to your hunter—some skills simply raise your stats or protect you from status ailments while others can speed up your weapon sheathing, allow you to swim faster, or even gain more carves from a defeated monster!

Most armor pieces only give 2-3 skill points toward a skill, and, in most cases, only activate a skill once an entire set is equipped. You can check progress toward a skill, as well as your activated skills, by checking your Status.

Check out our skill list to see the vast array of skills that you can apply to your hunter.

Moga Woods

Welcome to Moga Village! This quaint fishing town serves as a base during your Monster Hunting adventures. While small, Moga has a wide array of features and attractions making it the perfect home for the enterprising Hunter.

In Moga Village, you can find facilities to improve your weapons and purchase new items, as well as a personal fishing fleet to send on their own adventures! Making full use of Moga Village's features is key to succeeding in *Monster Hunter 3 Ultimate*. Make sure to constantly keep in touch with the Moga inhabitants!

Moga Woods Layout

1 Pier

The Pier is your disembarking point for every Quest you take from the Quest Counter. After you take a Quest, move to the Pier and press Ⓐ to be on your way!grants you various Felyne skills as well as increases your Health and Stamina.

2 Quest Counter

You become very familiar with the Quest Counter and the Guild Sweetheart that works there over your Monster Hunter adventures. The Quest Counter is where you get all the Quests in Moga Village. Talk to the Guild Sweetheart and choose your Quest to get started.

3 Canteen

The Canteen is a tiny kitchen run by the Itinerant Cook, a Felyne with ambitions of becoming a master chef. At the Canteen, you can purchase food before every Quest that grants you various Felyne skills as well as increases your Health and Stamina.

CANTEEN MENU

Each combination of meals and cooking styles offers a variety of bonuses, some set and some random. In the accompanying table you can find information on the following:

Ingredients: The two ingredients chosen for a meal.

Cooking Style: The method of cooking chosen to prepare the meal, either sauté, stew, steam, or fry.

Stat Bonus: The stat bonus provided for eating the meal. The Stat Boosts you get from Canteen meals differ depending on how far you've progressed through the game. You get larger Boosts as you reach higher difficulties. The kitchen upgrades when you reach High-Rank, and then again when you reach G-Rank.

Added Skill: The skill added by the ingredient combo. Some skills are always given while others are selected randomly from a pool, depending on whether the meal is from food or drinks. The list of random skills is located in the Daily Skills section.

Daily Skills

Many of the Felyne skills you can earn are only granted randomly. Also, certain skills are only available when you eat a meal with drinks and some are only available after reaching certain difficulties.

The accompanying table provides information on the following:

Skill Name: Name of the skill earned. Skills marked with (1) can only be earned at High-Rank difficulty while skills marked with (2) are only obtainable at G-Rank difficulty.

Normal/Drinks: Confirms if the skill is available for earning skills marked "Daily Skill (Normal)" or if they're available for "Daily Skill (Drinks)."

4 Village Chief

The wise Village Chief is your main contact for new story developments in Moga Village. He also gives you tips about the Quest you're about to take as well as general hunting tips. Be sure to chat with him once and a while; you might learn something!

5 Your House

Your House is where you store extra items and equipment. It's also where you bed down after a grueling day of Hunting. The Red Box in your room holds your stored items and equipment, so go there if you need to unload some materials or put on a new weapon. If you want to gussy up the place, you can talk to the Chamberlyne and get some fancy decorations for display.

6 Armory

The Armory is a little store where you can purchase weapons and armor with straight cash, no materials required. The Armory doesn't have much selection, so only use it when you want to start over on a weapon tree and have tons of zenny to blow.

7 Smithy

The Wyverian Artisan at the Smithy will quickly become one of your best pals, as you need to chat with him whenever you want to upgrade weapons or purchase new armor. He can also create decorations to augment your skills and equip new attachments on your Bowguns! Be sure to chat with him whenever you defeat a new large monster to check out the possible equipment you can create.

8 Moga Village Entrance

Traveling down this path leads to the Moga Woods, a free hunting area where you can hunt as long as you want without fear of losing zenny! Killing enemies in Moga Woods earns you Resource points, which you can use to fulfill Village Requests, farm for new materials, and send out your Hunting Fleet. Be sure to drop by the Moga Woods every once and a while. Take out some monsters and build up your Village!

MOGA WOODS MONSTERS

At the beginning of the game, Moga Woods is mostly uninhabited and only small monsters live there. As you complete Village Quests, large monsters start to appear. This gives you the chance to hunt them without worrying about fainting. Check the Moga Forecast to see which monsters will be there and at what time of day.

The accompanying table provides information on the following:

Time of Day: Certain monsters are only found in Moga Woods at particular times of day. Also, the time of day determines the strength of the monsters. Day features Low-Rank monsters while at Night you encounter High-Rank monsters.

Monster: The name of the large monster.

Village Level: What Village level you need to reach before the monster unlocks.

Unlock Requirement: What Quest or other action you need to complete before the monster appears in the woods.

Rare Value: The value, in stars, of the Rare Good the monster drops.

MOGA WOODS RESOURCE POINTS & REWARDS

After turning in your Hunt Report to the Chief's Son, you are given Resource points and Rewards that you can only get for defeating Moga enemies. These drops are usually useful for trading with the Argosy Captain or using to enhance your crops.

The accompanying table provides the following information:

Monster: The name of the monster.

Time: When you can find the monster. Large Monsters that appear during the Day and Night both have different drops, but some monsters can only be found at one time of day. If "Both" is listed, then the monster can be located at Night and at Day.

Kill: How many Resource points you are given for killing the monster.

Cap.: How many Resource points you are given for capturing the monster.

Items: What items you can possibly be rewarded after turning in a Hunt Report.

%: Chance you have of receiving each possible reward. For large monsters, there is a different % for killing and capturing the monster; each is listed separately. If the numbers aren't separated, then they're the same for both capturing and killing the monster.

9 Ferry

This Ferry takes you to Tanzia Port, where you can embark on a new series of more difficult Quests. Tanzia Port is also where you can find the series of Arena Quests where you can participate in various Hunting training exercises. Any DLC Quests you download are also located in Tanzia. Be sure to head there whenever you receive a new Quest!

10 Market

This general store sells a variety of goods needed for your Hunting adventure. You can find Gathering Items like Pickaxes and Bug Nets, restorative items like Herbs, and informative guides on each of the monsters found in *MH3U*. Don't forget to stop by here before a Quest to get yourself outfitted!

11 Hunting Fleet

The Hunting Fleet is a series of boats that go on their own quests, independent of your hunts, and gather materials from all around the vast ocean. Sending the Hunting Fleet on a journey requires spending some Resource points, but the materials they bring back are well worth it.

HUNTING FLEET REWARDS LIST

There are 11 different areas your Hunting Fleet can travel, each with its own unique materials, trip cost, and voyage time. In the accompanying table, you can find information on the following:

Area Name: The area you are sending your Fleet.

Cost: How many Resource points you need to spend to send a Fleet ship on a journey.

Time: How many days that need to pass before your Fleet ship returns. A day passes whenever you go on a Quest and return.

Lvl Required: The level your Hunting Fleet ship needs to leave on a Quest.

Reward/Reward %: The item, as well as the chance you have of receiving each item.

(A)/(B): Certain items are only rewarded after the village is built up high enough.(A) indicates rewards for low-level village while (B) indicates rewards for high-level village.

12 Argosy Captain

This unique otoko (which means "man") is a sailor who travels around the world gathering materials from all sorts of different ports. You can trade items with him to receive a wide array of unique and useful items. You can also trade items found in Moga Woods for other unique and valuable Rare Goods! He also has items that can upgrade your Hunting Fleet and teach your Shakalaka friends new Dances. Be sure to chat with him whenever he's in town!

RARE GOODS

Outside of normal items that can be traded for, you can also get many Rare Goods from the Argosy. These are mostly items you can't get anywhere else! These items can't be traded through normal trading; you must trade rare items obtained from killing large monsters in the Moga Woods. These items have a ★ rating attributed to them and can only be traded for items of equal or lesser ★ rating. A ★2 Rare Good can only be traded for with a ★2 or higher item. Check out the Moga Woods section for info on how to find all of the rare items.

In the accompanying table, you can find the following information:

Route: The Route the Argosy needs to travel for the item to be available.

Item: The name of the item being traded for.

★: Value of the item in ★s.

Requirement: The requirement to unlock the item. In most cases, items are made available as you raise your Village Level. But in a few cases, you need to complete a specific Quest (or all Quests!) to unlock an item.

13 Stockpile

At the Stockpile, you can find the Chief's Son who keeps an eye on Moga Woods. Talk to him to find out the latest happenings in the woods, such as new monsters that can be found there. He can also tell you about Requests from the villagers in town, which can be completed to upgrade your village!

VILLAGE REQUESTS

New Requests become available as you complete Quests in the village and raise your village's level by finishing Requests, Quests, and upgrading the Fishing Fleet. In the table of Requests, you can find the following information:

Request Name: Name of the Request.

Unlock Requirements: How the Request is unlocked. Generally this is through raising your village level, but it can also be done after completing certain Quests or filling other Requests.

Reward: What you're given after fulfilling the Request.

Points: How many Resource points you need to turn in to complete the Request.

Items: What items and the amount you need to turn in the Request.

TRADABLE ITEMS

You can trade items to the Chief's Son for Resource points without needing to kill monsters. If you need points but don't necessarily want to take a journey into Moga Woods, consider trading some of your extra materials for Resources.

In the accompanying table, you can find the following information:

Item: Name of the item you can trade.

Value: How many points the item is worth.

Time: The earliest you can find the item. If nothing is listed, then you can find the item immediately.

14 Farm Entrance

The village farm is down this path. This is where you can grow your own materials. You can find more information about the farm on the next page.

Farm

Venture out of the south side of Moga Village and you'll run into the Farm, a quaint area where you can cultivate crops and pet a piggy.

The primary function of the Farm is to create useful items for combining so you don't have to spend as much time gathering. Keeping up with your Farm is important for becoming a master hunter!

Farm Functions

The Farm can produce four kinds of materials: plants, mushrooms, honey, and bugs. Each of these functions is unlocked shortly after beginning the game. You start out with only a single Felyne farmer, but additional Feylnes return to the Farm as you progress through the game.

To start producing goods at the Farm, talk to the Head Farmer to send one of your farmers to work. They work on producing the item you select as long as you tell them to. How long you can set a farmer to work depends on the box's level—the higher the level, the longer they can work.

To start farming you must spend Resources. Different items cost different Resources—the more valuable the item, the higher the cost in Resources.

You can produce more goods at a time by adding some fertilizer, which is found by defeating enemies in Moga Woods. Fertilizers help you make more items at a lower Resource cost, so you should try to add in fertilizers whenever you can.

Upgrading the Farm

As you progress through the game, the Chief's Son occasionally tells you when the Farm is ready to upgrade. Complete a Request to earn the upgrade—they're often well worth it.

Higher level Boxes can produce items for longer, requiring you to visit the Farm less often, and also produce more items a day—a Lv1 Box only produces 2-4 items a day, but a LvMax Box can produce 6-8!

Upgrade Farm Boxes incrementally—LvMax upgrades only become available after the Lv2 Upgrade is purchased.

Farmable Items and Success Rates

Depending on the item you're trying to farm, there's a slim chance the item can fail. This list shows each item that can be farmed, it's success rate, and how many Resource points it requires to be farmed per day.

Items in this table:

Box: The Box used to farm an item—Field, Mushroom, Honey, or Insect.
Item: Name of the item.
Success %: Percentage chance the item will successfully be cultivated. If an item fails, you get a failure item, which varies depending on the box.
Res. Cost: Cost in Resource points to cultivate the item for one day.

Your Pal, Poogie

Alongside your Felyne farmers, you'll also find the adorable pet Poogie, who you can make your own precious pet. Before he becomes truly yours, you must perfectly pet him several times. Approach Poogie and press the A button to interact with him, then select Snuggle. Wait for the exclamation point to appear, then press A again and he'll become yours for life!

You can also change Poogie into one of several different outfits. Three of these are available by default, but the others can only be acquired by trading with the Argosy Captain.

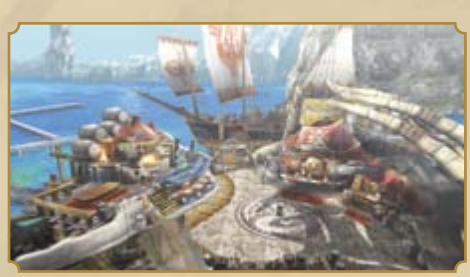
Tanzia Port



Tanzia Port is a bustling hub where you can meet up with players for multiplayer hunts as well as take advantage of several unique features not normally available in Moga Woods.

In Tanzia you discover many of the features you'd normally find in Moga Woods along with a few bonus facilities that are not normally available.

In Tanzia, you can find the following facilities and people/Felynes.

1—Quest Departure Exit: This is where you need to go to depart on a Quest from Tanzia Port.

2—Item Box: Functions similarly to the Blue Item Box in your House. Check this to change your equipment and store items.

3—Quest Board: The Quests other players buy show up on the Quest Board. Check here whenever you're playing multiplayer to go on a cooperative Quest.

4—Quest Counter: Here is where you can set up Quests for yourself and everyone playing in multiplayer.

5—Guildmaster: The head of the Tanzia Hunter's Guild allows you to set up your Hunters for Hire info. The Guildmaster also occasionally hooks you up with VE Tickets, which you can trade to the Veggie Elder.

6—Arena Quest Counter: Here you can set up Arena Quests, which are special challenges where you receive a premade set of armor to fight various monsters. More info on the Arena is found in the Arena section.

7—Canteen: Much like the Canteen in Moga, you can purchase a meal here to pump up your Hunter before a Quest.

8—Guild Store: Much like the Market in Moga Village, this item store has many useful hunting items. The Guild Store also gets new items that you normally can't buy with zenny in the Village, like Book of Combos 4 & 5, and Power and Armorcharms. Check here when you reach HR2 and HR3 to see what new items they stock.

9—Bed: Use this to save the game.

10—The Ferry: The Ferry takes you back to Moga Woods, but in Tanzia it also lets you check on your Farm without leaving! Talk to Neko (which means "cat") to check on your Farm while you play multiplayer.

11—Felyne Courier: This Felyne activates and manages your StreetPass data, which automatically sends your Guild Card to people you pass by. Getting certain amounts of StreetPasses might entitle you to a reward!

12—Granny Go-To: This Wyverian saleswoman sells various useful items that you can't normally find in the store! More info on her can be found in the Granny Go-To section.

13—The Smithy: The Smithy in Tanzia lets you buy and upgrade weapons and armor without needing to travel back to Moga Village. Otherwise, he's the same as the Smithy in Moga.

14—The Armory: Much like the Moga Woods Armory, you can buy weapons and armor here with just zenny. There are several sets of armor that can only be obtained here, so be sure to check it out!

15—Savvy Tabby: This Felyne gives you game tips and tells you about various things going on in the *MH3U* world. If you talk to him whenever Kayamba and Cha-Cha's Chum-Chum level increases, he gives you a Chum-Chum Ticket.

16—Aptonoth: When you interact with the Aptonoth, you have a chance of getting free Dung! You can only say "hi" to this guy once an in-game day.

Granny Go-To

This traveling Wyverian saleslady offers many items the Guild Store and Market don't sell, like insects, fish, and premade Barrel Bombs! Be sure to check her wares often to see what items she has in stock.

Arena

Alongside the usual Guild Counter where you can access the multiplayer-capable Tavern Quests, you can also find a series of Arena Quests which pit you against a specific monster in an enclosed Arena with predetermined gear and items. You won't use any of your own equipment in these Quests; instead, you are given a set of weapons and armor making this a real Hunting challenge!

In the Arena, you can earn unique Coin items that cannot be acquired anywhere else. Also, each fight is timed and you can earn one of three ranks for completing the fight as fast as possible.

Some Arena Quests can be played with other Hunters, giving you a better chance to take out your enemy.

In this section, you can find a list of each Arena Quest, how to unlock it, and what equipment sets you'll use in battle.

Usable Items

Over the course of your Monster Hunter adventure you will find thousands of items of various types including insects, plants, rocks, potions, and even several varieties of dung!

Gathering Items

There are several items that's primary use is generally to get more items. These items are generally purchased at the store, but can also be created by combining items with each other so you can get items to make items to get more items!

BUG NET

This item is used at points where you can see fireflies or butterflies hanging around. Gathering bugs serves many purposes, mostly bombs, ammunition, and occasionally even weapons.

PICKAXE

These items are used to gather ore from mining veins in the world. Generally these veins are found in dark, rocky areas, but can also be found underwater. Ore is used mostly for creating equipment.

BAIT

Worms and Mega Fishing Flies are used to gather fish from Fishing Spots located, naturally, near large bodies of water. Fish are mostly used to create ammunition.

HARPOONS

Harpoons are unique items in that they are weapons that can deal direct damage to enemies. This damage is very low, however, but they must be used to kill Fish enemies in order to skin them. Harpooned Fish parts are used mostly for equipment.

Recovery Items

There are several items that exist only to keep you alive and fighting. Items that restore your hunter's Health and Stamina generally are fairly self-explanatory.

POTIONS

This classic RPG item restores 25% of your Health and is useful whenever you get hurt. Potions restore both red and green life, although it's best to use them when your red life is restored to get the best bang for your buck.

WHETSTONE

When your weapon loses its Sharpness, it bounces off of enemies and deals less damage when it connects. If your Sharpness level decreases two or more times or is bouncing more often than it used to against a monster, use a Whetstone to bring it back to its previous glory.

STEAKS

These delicious treats restore your Stamina or increase it beyond its normal capacity. To make a Steak, cook Raw Meat using a BBQ Spit. The best Steak you can make is a Well-Done Steak, which restores 50 points of Stamina. A Rare Steak will restore 25 Stamina and a Burnt Steak can restore 25 Stamina, but can just as easily drain your Stamina!

ANTIDOTE

These items are mostly useless, but very important if you are poisoned. If so, drink one of these ASAP to keep your Health from draining.

Stat Boosting Items

There are many items that boost your stats, making you stronger, sturdier, and faster, giving you a leg up on enemy monsters. These items are usually strong, but unfortunately either limited by time or last only until you faint in battle.

NUTRIENTS

These potions increase your maximum Health when you're on a quest, allowing you to take more damage and fight longer.

ARMORSKIN

This concoction increases defense by a significant amount, but only for a limited time. Take one of these when you see a monster to take less damage while you figure out their attacks.

COOL DRINK

This refreshing beverage increases your heat resistance, allowing you to walk through hot areas without losing health.

HOT DRINK

Increases your resistance to Cold areas, which drain your Stamina faster than normal. Knock back one of these to keep fit and able to run around the Tundra for days.

Combat Items

Many items give you added combat prowess, allowing you to hit targets you couldn't normally hit, incapacitate enemies or even blow them to smithereens!

BOOMERANG

This wacky item can be thrown, like a stone, but it will return to you. The Boomerang angles upwards, allowing you to hit enemies higher than you normally could!

FIELD HORN

There are several varieties of Horn, each with their own unique functions. The normal Horn alerts enemies, causing them to target you more often in battle. There are also horns that heal any allies in an area or even increase their attack for a limited time!

TRAPS

The Pitfall Trap and Shock Trap incapacitate an enemy, trapping them and allowing you to unload on them without fear of retribution! Shock Traps set up quickly, but don't trap enemies for very long while Pitfall Traps keep enemies subdued for a long time and also cause them to suffer more damage than usual!

BARREL BOMBS

There are many varieties of explosive barrels, each of which deals huge damage as long as you can lure an enemy into them. Small Barrel Bombs automatically detonate after a few seconds, but Large Barrel Bombs only explode if they are struck by either you or a monster. Use the two bombs in tandem to create a massive chain explosion!

Combine List

You can increase your Combination Success rate using the Book of Combos items, which can be either purchased from the Guild Shop, Moga Village shop, or earned as Rare Trades from the Argosy. In a Quest you'll need to carry them as items in order for them to work, but if you're combining from the box, their effect will automatically be applied, as long as they are also in your Box.

BOOK OF COMBOS SUCCESS RATES

BOOK NUMBER	SUCCESS RATE	CUMULATIVE RATE
BOOK OF COMBOS 1	+5%	+5%
BOOK OF COMBOS 2	+5%	+10%
BOOK OF COMBOS 3	+10%	+20%
BOOK OF COMBOS 4	+10%	+30%
BOOK OF COMBOS 5	+20%	+50%

There are 168 Combinations you can create, each of which is required for the Scroll of the Sage Award. Once you've made a combination, it will show up in your Combination List, allowing you to easily create it without needing to search for each specific item!

Shakalaka Warriors Cha-Cha & Kayamba

Once you reach 3★ Quests in the Moga Woods you meet Cha-Cha, a Shakalaka child trying to become a bona fide Shakalaka warrior.

At 5★, you're given the chance to recruit another Shakalaka child, Cha-Cha's rival Kayamba. This gives you two allies to take on Quests!

Cha-Cha and Kayamba are meant to give a solo player who can't find human hunting partners a fighting chance against higher difficulty monsters. These Shakalaka allies have a variety of abilities they use to support you through High-Rank missions and beyond.

To interact with one of your Shakalaka pals, press Ⓐ when near them. You are then presented a screen with the following options:

From the Library of Jak Murasaki

Invite on Quest/Leave Behind

Selecting this option determines whether or not you bring Cha-Cha or Kayamba on a Quest. By default, they're set to not join you. Be sure to select this option to ensure they are there when you go on a Quest!

Change Mask

This allows you to change Cha-Cha's or Kayamba's Mask. Different Masks give the Shakalakas brand new abilities, like lighting up an area or even breathing fire!

Select Dances

Change the Shakalaka's Dances—special songs they can play to perform actions, such as taunting monsters, increasing your attack, or even restoring your Health!

Select Abilities

This option allows you to set a Shakalaka ability onto a Mask. Use skills to add an Elemental attribute to their attack or give them the ability to focus only on gathering.

View Stats

This option takes you to a screen that displays information about Cha-Cha's or Kayamba's level, their attack power, and how much Stamina they have.

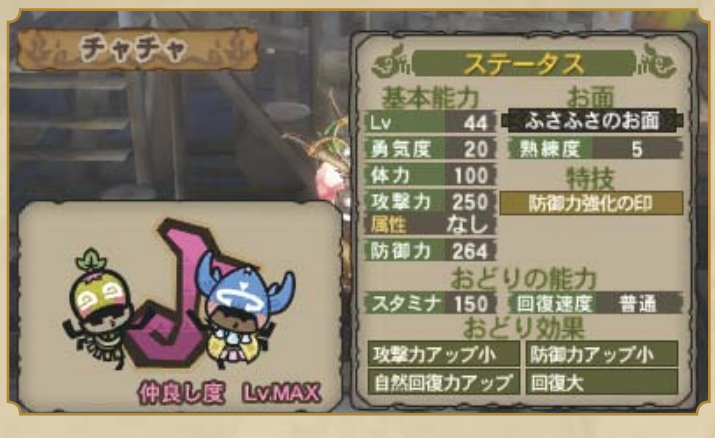
Multi: Take Along/Leave Behind

This option selects whether or not you take one of the Shakalak's with you in multiplayer. You can only bring one of them at a time. Try to pick the Shakalaka with the lowest level so you can make them both stronger!

©2013 DK/BradyGAMES®, a division of Penguin Group (USA) Inc. All Rights Reserved.

From the Library of Jak Murasaki

When you select View Stats, you're taken to a screen that shows all of Cha-Cha's or Kayamba's information at a glance. The following explains the features found on this screen:



Lv

This displays the Shakalaka's experience level. Shakalaka's gain levels when you defeat monsters; stronger monsters in difficult Quests are worth more than weaker monsters in easier Quests. Leveling up a Shakalaka gives them access to new abilities and also increases their other stats.

Valor

This stat determines how likely the Shakalaka is to fight large monsters or stay in battle. Valor increases as the Shakalaka gains levels and Chum-Chum levels.

Health

This display the Shakalaka's Health. The more Health they have, the longer they can fight!

Attack

This displays the Shakalaka's attack power.

Elem

This displays the Shakalaka's Elemental or Abnormal attack power. The only way they can get special attack values is by equipping an ability that grants them.

Defense

This displays the Shakalaka's Defense.

Masks

This shows the Shakalaka's currently equipped Mask.

Mastery

This value increases as the Shakalaka completes Quests while wearing a Mask. Mastery determines what bonuses are given by a Mask, as well as how well they can use its abilities.

Abilities

This displays what abilities the Shakalaka has equipped.

Stamina

This is the maximum Stamina the Shakalaka has at the beginning of a mission. Stamina is consumed whenever the Shakalaka Dances and is restored over time. Different Dances consume different amounts of Stamina.

Recovery

Recovery is how quickly the Shakalaka's Stamina regenerates after a Dance is performed. Recovery changes depending on which Mask the Shakalaka has equipped.

Dance Effects

This is a list of the possible Dance Effects the Shakalaka can perform with their equipped Dances.

Chum-Chum Level

A visual representation of how close the two Shakalakas are as friends. Their Chum-Chum level increases as they go on Quests together and as you fight stronger monsters.

Dances

At all times, Cha-Cha and Kayamba are equipped with two separate Dances. When combined, these Dances allow the two Shakalaka to Dance and bestow special effects onto you, usually in the form of Health recovery!

To change a Shakalaka's Dance, talk to them and choose the Select Dances menu. Pick two of the available Dances to create a table of possible effects. Each dance has a note attached to it, and each combination of notes creates a different table of effects.

©2013 DK/BradyGAMES®, a division of Penguin Group (USA) Inc. All Rights Reserved.
From the Library of Jak Murasaki

Each Dance has a Stamina cost attached to it, displayed in terms of High, Medium, and Low. The higher the Stamina cost, the less often they can Dance. Keep this in mind when selecting Dances.

There are five Dances in total. Cha-Cha knows two and learns an additional Dance after Kayamba becomes your ally. The other two Dances can be traded for from the Argosy Captain after specific Quests have been completed.

DANCE ABILITIES

Each Dance Ability has several features. The accompanying table provides information on the following:

Chum-Chum Dance: The effect when both Shakalakas perform the Dance together. This only occurs if Cha-Cha and Kayamba's Chum-Chum level is high enough.

Duration: How long the Dance's effect lasts. Dances with no Duration occur immediately.

Delay: The longer the Delay, the longer it takes for a Shakalaka to perform the Dance again.

Stamina Consumption: How much Stamina is consumed when the Dance is performed. Stamina regenerates slowly over time.

Masks

Throughout your journey in Moga Woods, Cha-Cha and Kayamba come up with ideas for new Masks. These Masks grant them new abilities, increase their attack and defense, and even influence their behavior in combat!

To get new Masks, you need to complete Quests against large monsters. Every once in a while, the Shakalakas are inspired to create a new Mask and file a request with the Chief's Son. When this Request is completed, they receive a new Mask!

Only one Shakalaka can equip a Mask at a time, and some Masks can only be equipped by either Cha-Cha or Kayamba. Collecting all the Masks is a considerable challenge, but it makes your Shakalakas more powerful than you could possibly imagine!

Acorn Mask

Unlock Requirements: Cha-Cha has it by default

Special Ability: Cha-Cha only

This is a well-rounded Mask that only Cha-Cha can use. While it has no special abilities, it remains useful throughout the game because of its well-rounded stats.

MASK STATS

STAT MODIFIERS	ABILITIES	ATTACK RANGE	TARGET PREF.	RETREAT HEALTH	GATHERING ODDS	ANGER RATE	ANGER ATTACK	SPECIAL ABILITY

Mystery Pot Mask

Unlock Requirements: Clear two Village ★4 Quests that aren't "Harvest Tour: Tundra" or "Accident Investigation," fulfill Villager Request "Field of Dreams," then talk to the Head Farmer

Special Ability: Item Change

This Mask allows you to change items into other items, sometimes for the best and sometimes not. The types of items you can get depend on your Mask Mastery.

The more you raise Mastery, the better items you can receive. The Color of Smoke emerging from the Mask determines what kind of item you receive. If you don't have time or forget to reclaim your item, he gives it back when you talk to him after the Quest.

Abilities

Abilities are unique traits that can be assigned to a Shakalaka and allow them to perform a variety of additional functions. Many of these abilities give the Shakalaka Elemental or Abnormal Status abilities, while others may simply increase their stats.

The number of abilities the Shakalaka can equip depends on the equipped Mask and how much Mastery they have. At most, a Shakalaka can equip three abilities, but some Masks can only ever equip one!

New abilities are acquired as the Shakalaka gains levels, but you won't know if they've gained any until you talk to them. Speak with them often to earn their new abilities and make them as powerful as possible!

The accompanying table contains the following information:

Name of Ability

Function

Level Learned: The level needed for the Shakalaka to unlock the Ability.

How to Learn: Even if the Shakalaka reaches the required level, they don't learn the Ability until they also perform the action listed.

Monsters

This section provides data for each of the monsters found in Low-rank and their carves in High- and G-rank. Use this information to prepare for a Quest by bringing the most damaging weapon against a given type of monster. You can also learn how to find the necessary pieces to create new, more powerful weapons and armor.

How to Use this Data

Damage Chart: How much damage a monster incurs from a weapon. The numbers are separated by type of damage and as a percentage of a weapon's attack power. Multiple numbers in a cell indicate that a monster's defense changes when it is enraged. As an example, Arzuros's body has an Impact defense rating of 50/30, which means that he suffers 50% of a Hammer attack's damage on his body, but only 30% when he's enraged.

Habitats: Which areas a monster may travel to in a particular map. If the number is not listed, the monster will not travel to that area. The area marked with "(Start)" is where the monster spawns in once a quest begins, but it will probably move out of that area before you can reach it. The area labeled "(Rest)" is where the monster goes to sleep after it suffers significant damage. If no (Rest) area is indicated, then the monster will sleep in the area labeled (Start).

Sizes: The sizes required to earn the indicated crown for each particular large monster. This information is useful for earning the Miniature, Large, and King's Crown Awards on your Guild Card.

Anger Effects: The boosts (or penalties) a monster gains when it enters raged state. The more "+" marks, the more that stat is enhanced. Likewise with "–" marks. If "=" is listed, then the stat remains the same during rage state.

Tolerances: How vulnerable to abnormal status effects a monster is. Duration indicates how long an effect lasts, Initial Tolerance indicates how easy or difficult it is to inflict a status element on a monster, Tolerance Increase indicates how much their Tolerance increases after being inflicted with a status element, and Damage indicates how much damage the status element deals. Poison, Sleep, and Paralyze are self-explanatory. Dizzy indicates their susceptibility to being stunned by Impact weapons, Fatigue indicates how much they suffer during fatigue state, and Explosives indicates how much damage is suffered from Bomb attacks.

Part Durability: Indicates the Durability of each vulnerable area on a monster, as well as the effect when the Durability is decreased to zero. In some cases, this is accompanied by a visual effect of a part visibly breaking, but this is not always the case. If an effect is indicated as Alternating, it means the effect changes after each time the Durability is decreased to zero, starting with the first listed effect.

Breakable Parts: Which areas on a monster are breakable. In many cases, this means decreasing the Durability of a part to zero; ocassionally multiple times. Otherwise, this requires dealing damage of a certain type, either Impact or Cut. The requirement to break a part is listed for each part.

Carves: What items you can get whenever you Carve a defeated monster. The number of times you can carve a monster is listed by each part.

Break Part Rewards: When a monster part is broken often, you'll receive additional rewards at the end of a quest.

Tears: What items you can get from picking up monster tears and how to cause a monster to produce these tears. Monsters have a limited number of tears they can produce; this amount is listed by each Tear chart. If a % chance is listed by a Tear, it indicates how likely it is a monster will produce Tears when the specified action is performed.

Free Hunt: The rewards earned for hunting a monster outside of a quest's objectives. Free Hunt monsters differ depending on the quest and are listed in each quest's description.

Altaroth Belly changes color when it eats at a gathering spot. The color it's belly turns to depends mostly on what type of gathering point it eats at:

Blue—Altaroth eats at a Mushroom spot

Green—Altaroth eats at a Fruit spot

Yellow—Altaroth eats at a Honey spot

Gray—Altaroth eats anywhere else

Gold—12.6% chance that the Altaroth will eat somewhere then turn Gold

Quest List

Intro

Monster Hunter 3 Ultimate features a massive number of Quests for both the solo and social player. These quests are separated into five sections:

Moga Village — Low-rank

These are the basic single-player quests that send the player through the story of *Monster Hunter 3 Tri*, with some of the new monsters thrown in to create a new experience. These quests are important even for players mostly interested in multiplayer as they unlock additional features such as the Moga Woods, Farm, and the AI partners Cha-Cha and Kayamba.

Moga Village — High-rank

These new, harder quests are a unique single player campaign created for *Monster Hunter 3 Ultimate*. They go through an all—new story and present the player with monsters new to MH3 such as Zinogre, several unique Subspecies monsters like Ivory Lagiacrus, as well as Brachydios, the featured monster of MH3U.

Tanzia Port — Low-rank

Tanzia Port is the multiplayer hub of MH3U and replaces the town of Loc Lac found in *Monster Hunter 3 Tri*. All multiplayer activity happens in Tanzia, but each of these quests can be played solo, as well. Tanzia quests may seem similar to Moga Village quests, but they are much harder, featuring stronger and more durable monsters.

Tanzia Port — High-rank

Much like Moga Village, these quests are harder and feature new monsters and challenges.

Tanzia Port — G-rank

These quests are the "Ultimate" challenge for players, featuring incredibly strong monsters, as well as new, unique Subspecies and a secret boss for the most devoted hunters. This is the true meat of the game and, as such, created for the most skilled and dedicated hunters.

The information displayed in the Quest List is as follows:

RANK: The ★ ranking of a quest. ★s indicate difficulty: 3★ is easier than 4★. Tanzia and Moga Village ★ rankings are not equal; however, 1★ in Tanzia is equivalent to 3★ to 4★ in Moga.

KEY/URGENT: Key indicates a quest that needs to be completed in order to unlock the Urgent Quest. Urgent Quests act as "bosses" and are the gate between ★ rankings. For example, to reach 2★, you don't need to complete all the 1★ quests; only the Key Quests "Harvest 'Shroom," "Farm Aid," and "Guts: It's What's for Dinner." Completing those three quests will unlock the 2★ Urgent Quest "No Love for Ludroth."

LOCATION: The zone where a quest takes place. There are six major zones: Deserted Island, Sandy Plains, Flooded Forest, Tundra, Volcano, and Misty Peaks. There are several additional zones that are mostly small, enclosed areas such as the Land Arena and Water Arena.

NAME: The name of the quest.

PRE-REQUISITES: Some quests are locked behind other quests and will only become available once a certain action is performed. For example, "Harvest 'Shroom" is the only 1★ quest available near the start of the game. Once it is completed, the other five 1★ quests also become available.

NOTES: Additional notes on a quest. Mostly, this indicates quests that cannot be repeated once they are finished, quests that are part of a Set that tie into another unlock, or quests that appear at random.

QUEST GOAL: This indicates the monster or item that is the primary focus of the quest. Most quests involve the hunting of a large monster, although there are several quests where small monsters must be defeated or items must be delivered. If "& more" is listed, then multiple large monsters must be hunted to complete the quest.

Intro

In this section you'll find details on every possible gathering point and what items you can get.

In *MH3U*, unlike other Monster Hunter games, spawn points are generated at random and the items you get aren't guaranteed to be there when you originally walk into a zone. However, gathering points respawn every five minutes, giving you the chance to harvest more than you normally could as long as you remain vigilant.

As such, spawn points are not guaranteed to be there. The best way to use the information in this section is to look for the item you need and then find where it is located. Otherwise, you'll be in an area without any of the items you want, but you'll also be looking for items while the rest of your team is fighting an enemy! Get used to where you can find each item and go to a zone for the item, not the other way around.

Each section is broken up in a specific way:

- **SPOT**
  What kind of spot you'll find these items. Fishing Spots require bait-type items, Mining Spots require Pick Axes and Insect items require Bug Nets. Collect areas can be gathered from without any items.
- **SPAWN RATE—This section determines how the item is spawned. Fixed means the spawn point will always gather these items, otherwise the letter and number indicated describes how often the set of gatherable items is spawned. If an item is marked Hidden it means you can only find that set of items if you spawn in the hidden area of a Zone in High-rank and above.**
- **POSSIBLE GRABS**
  How many times, by default, you can gather from a certain point. This number can be extended or decreased through Armor Skills and Felyne Skills.
- **ITEM**
  The possible Items you can gather from a certain point.
- **ITEM %**
  What percentage chance you have on every grab to gather a certain item.

Understanding the Equipment Tables

1. **NAME and IMAGE:** Specific variety of Great Sword.
2. **ATTACK:** Attack power of the weapon.
3. **SPECIAL:** Attribute of the weapon. If the attribute is listed in "()" parentheses, then the attribute is given only when the Armor Skill "Awaken" is activated. If the attribute is listed in "[]" brackets, then the attribute is activated only when the Switch Axe is in Sword mode.
4. **SHARPNESS:** Maximum level of Sharpness the weapon can have. Max Sharpness can change if the Armor Skill "Sharpness +1" is activated.
5. **SLOTS:** How many Open Slots a Weapon has.
6. **AFFINITY:** Damage and possibility a weapon has of activating a Critical Hit.

Great Sword	2 ATTACK	3 SPECIAL	4 SHARPNESS	5 SLOTS	6 AFFINITY	7 VILLAGE	8 TAVERN	9 COST	10 INGREDIENTS	11 RARITY
1 Blade of Tartarus	1344	(Dr320)	Green	OO–	0%		6	55000	Monster Slugbore x3, Mohran Bracer+ x4, Massive Bone x5, Lrg Wyvern Stone x1	8

7. **VILLAGE:** How early this armor can be obtained in Village Quests. Figure refers to number of stars.
8. **TAVERN:** How early this armor can be obtained in Tavern Quests. Figure refers to number of stars.
9. **COST:** Zenny to create the weapon.
10. **INGREDIENTS:** Items required to create the weapon.
11. **RARITY:** Value of the weapon in terms of Rarity.

---

1. **RELOAD SPEED:** How quickly the Bowgun reloads ammo.
2. **RECOIL:** How much recoil the Bowgun experiences after each shot.
3. **STEADINESS:** Direction a shot deviates, if at all, from its original trajectory after being fired.
4. **DEFENSE:** Additional defense provided by equipping the Bowgun.
5. **CROUCH FIRE/RAPID FIRE:** Which shot varieties and how many can be fired by the Light Bowgun's Rapid Fire or Heavy Bowgun's Crouch Fire modes.

---

1. **SPCL:** Special Attribute of the weapon. If the attribute is listed in "()" parentheses, then the attribute is given only when the Armor Skill "Awaken" is activated. Fi = Fire, Wa = Water, Ic = Ice, Li = Thunder, Dr = Dragon, Slp = Sleep, Para = Paralysis, Pois = Poison.
2. **C1-C4:** Type of attack used in each level of Charge attack; R = Rapid, S = Spread, P = Pierce.
3. Which Coatings can be used with each Bow:
   - **PWR:** Power Coating
   - **POI:** Poison Coating
   - **PAR:** Para Coating
   - **SLP:** Sleep Coating
   - **C.R.:** C.Range Coating
   - **PNT:** Paint Coating
   - **EXH.:** Exhaust Coating
   - **SLM:** Slime Coating
   - If O is listed, then the coating can be used.
   - If + is listed, then the coating's effect is increased.
4. **ARC SHOT:** Type of shot fired during Arc Shot attack.

(1) **Class and Gender** that can use the armor.

(2) **DEF:** Defense of each piece.

(3) **Elemental Resistances:** FI = Fire, WA = Water, ICE = Ice, LI = Thunder, DR = Dragon.

(4) **STRNG:** Strengthening type of the armor. A Type receives more boosts from upgrading than B Type.

(5) **SKILL:** Skills activated by this equipment.

(6) **Points given by each piece:** H = Head armor, B = Body/Torso armor, A = Arm armor, L = Leg armor, F = Foot armor. Total is the number of points earned by equipment in general. The Active Skill is listed if enough points are given by the equipment to activate a particular Skill.

(7) **How many Armor Spheres are used to upgrade this equipment:**

AS: Armor Sphere

AS+: Armor Sphere+

Adv: Adv Armor Sphere

Hrd: Hrd Armor Sphere

Hvy: Hvy Armor Sphere

Tru: Tru Armor Sphere

No.: How many of each Armor Sphere variety is used to upgrade the equipment.

Def: How much defense the armor provides once it is fully upgraded.

Cost: How much it costs to for each incremental upgrade.

HUNTER'S TIPS Armors with Varying Resistances

* Some pieces of Armor have different Elemental Resitances on each piece of Armor, including the Escadora, Chakra and Vangis sets of Armor. In this tip, you can find what the Resistances on each of those pieces of armor is and the total granted by the entire set. Any armor sets with an * in their Elemental Resistances tables will be found here.
