INTRODUCTION

I would love to become a formidable web developer - to create immersive websites that inspire and push the boundaries of what's possible.

I have always been fascinated with computers and coding, and after working on my own website as a hobby for nearly three years, it's an industry that I plan to dedicate the rest of my life to.

EXPERIENCE

Shop Manager, Dash Dot Com

26 January 2009 – 31 April 2012

Malmesbury, Western Cape

Without any prior working experience, I started at a small IT Business, Dash Dot Com, as a Junior IT Technician. Within the first few months, I quickly expanded my existing technical skillset to provide top notch technical support and repairs.

After about a year, I earned the title of manager and started managing the workload of other staff, expanding their skillsets.

Responsibilities included:

- Purchasing stock and stocktaking
- Repair software (viruses, spyware, accidental deletions)
- Repair or replacement of faulty hardware
- Network installations (cabled/wireless/Mikrotik)
- Web design (CMS – Joomla)
- Sales representative
- Secure online backups of sensitive customer data
- Marketing and specials (including newsletter)
- Reselling ADSL data accounts, installing ADSL

SKILLS

I have built an ever-expanding skillset via training packages (video tutorials and e-books) and self-experimenting, that just needs a workplace to apply to.

PHP	Confident	C++	Tenacious	HTML	Great
CSS	Confident	JQuery	Learning	vBulletin	Good
Drupal	Confident	Java	Tenacious	SQL	Good
Delphi	Good	AJAX	Learning	SEO	Good
