

# LOLCODE

LOLCODE is a programming language which uses syntax from the cat memes. It is proven to be turing complete, which means it is theoretically as powerful as the other languages in common use.

Here is some example code, with wishes from our very own kittens!

```
HAI
CAN HAS STDIO?
VISIBLE "HAI WORLD! WE BORN IN IISc"
VISIBLE "HAZ YOU LIKE PRAVEGA PAGE?"
KTHXBYE
```

IISc  
Bangalore

Pravega

2013

Science, tech and cultural fest  
October 25-27, 2013
