

Blaze Black Volt White 2

ACTION REPLAY CODES

While I'm no advocate of cheating to allow you to get powerful Pokémon to sweep through the game, there are certain action replay codes that make the game more convenient, and thus a lot smoother to play. In this guide, I've compiled a few of them for you from various sources (though most are found in a public usrcheat file).

However, to use these codes on flashcards, you will need to edit your own usrcheat with the Game ID, as well as the codes. The IDs are as follows:

BLAZE BLACK 2, COMPLETE :: IREO 5F291275

BLAZE BLACK 2, VANILLA :: IREO 62F5EFD5

VOLT WHITE 2, COMPLETE :: IRDO 9687F042

VOLT WHITE 2, VANILLA :: IRDO 92E9B389

Double Movement

The Double Movement code is a usual one that will make your character move twice as fast. Basically, this means ordinarily walking is the same as running speed, and the running speed is twice as fast as before. However, the bicycle is unaffected this time.

Always Light in Cave

This is a nice code that removes the darkness you find in areas such as Mistralton Cave and Victory Road. Decide for yourself whether making Flash useless is worthwhile.

D2000000 00000000	D2000000 00000000

Hold L for Grass Shaking, Dirt Spot and Bubble

An incredibly useful code that will generate a rare patch just by holding down L and walking a step or two. This is great for Audino grinding, and will work near any grass, water, cave or bridge tiles. Note that you still need to have the first badge for it to have any effect!

Unlock Key System

If you mess up and forget to save before receiving the Easy and Challenge mode keys in Aspertia City, then you can use this code to unlock all of them instead.

D2000000 00000000	D2000000 00000000

No Low HP Music

If the low HP music drives you crazy, then you can use this code to stop it playing altogether. The regular trainer music will just carry on.

Hold R to Speed Through Battle Messages / Animations

This is a fun one that can make things really quick. The first part is for the messages, the second is for the animations. It's fairly self-explanatory.

Season Changing

This one will allow you to change the seasons quite easily - just input the combination and then exit a building. You need to do Select + Up for spring, Select + Right for summer, Select + Down for autumn and Select + Left for winter.

Automatic Hidden Grotto Regeneration

These codes, when activated, will cause all Hidden Grottos to spawn something new the moment you take a step. Note that they have to be empty first for anything new to appear! This includes hidden items, so do check for those.

D2000000 00000000	D2000000 00000000

Instant Messages

Although this is relatively unnecessary with the fast text speed in fifth gen, these will cause all text messages to appear instantly rather than being scrolling based. Note that it does cause some text to not appear at all, such as the "You are challenged by _____" when a battle starts.
