

# DESIGN & ENGINEERING

In-house vs. Outsourced

In-house vs. Outsourced IS LIKE Driving a Car vs. Taking a Bus

Keep an eye on your Fuel Level

Your trip starts with buying a steel building

On your mark , get set, GO!

## In-house Route

Designs start immediately

"I'm in control."

You will receive your designs 5-10 days later

"That was Fast!"

Approve your drawings or make changes

"Everything looks good. I'll keep going."

"My tank's good & my steel building is gonna look amazing!"

DESIGN PROCESS STARTS

APPROVAL DRAWINGS ARE SENT TO YOU

FOR CHANGES  
Head to Mile Marker 1  
Head to Bus Stop 2 (about 8 days behind the car)

CONGRATUALTIONS YOU ARE NOW EXITING THE DESIGN PROCESS

## Outsourced Route

Brokers typically shop for a low price design company  
Days later, your designs get started

"There are no seats!"

You will receive your designs 12-15 days later

"Is the next stop mine?"

If you make changes, call your broker & add at least a day to your trip

"Am I there yet?"

"That took forever. My tank & I are exhausted."
